Professional Summary

Senior Software Engineer with 7+ years of experience delivering end-to-end solutions across backend development, database engineering, and large-scale banking systems. Experienced in requirement analysis, system design, and software architecture with strong ownership of full system lifecycle.

Worked across 12+ enterprise-grade systems in banking and government sectors.

Proven ability to handle high-scale platforms (100K+ users), optimize performance, and automate critical business processes. Skilled in Node.js, Java, Python, Bash scripting, and relational databases.

Technical Skills

Programming Languages: C, C++, Java, Python, Bash, Node.js

Database: PostgreSQL, MySQL, Oracle, Redis

Frameworks: Spring Boot, Android

Tools, DevOps & Version Control: GitHub, GitLab, Docker, Kubernetes, GitLab CI/CD

Operating Systems: Linux, CentOS, Windows, macOS

Work Experience

Software Engineer

Celloscope Ltd | Oct 2021 – Present

- Led and contributed to **8–9 banking projects** including agent banking and payment systems
- Built and maintained **RESTful backend APIs (Node.js/Java)** for high-scale financial platforms (100K+ users), including authentication and API integrations
- Gathered and analyzed requirements from business and technical stakeholders
- Performed database design, CRUD operations, and **advanced performance tuning** (query optimization, indexing, partitioning)
- Improved system performance by approximately 20–30% through query optimization, indexing, and database tuning
- Managed **large-scale databases** and ensured high availability and reliability
- Executed **database backup, recovery, server migration, and deployment** processes
- Automated reconciliation and operational workflows, saving **~4–5 hours of manual work daily**
- Generated complex SQL reports to support business decision-making
- Configured Docker-based environments and GitLab CI/CD pipelines for automated deployment
- Provided production support and resolved critical issues for live systems
- Contributed to native Android development for agent banking applications

IT Executive & Database Administrator

DOER Services PLC | Oct 2018 – Sept 2021

- Managed database administration, monitoring, and performance optimization
- Provided technical client support and ensured system stability

- Maintained data integrity and handled operational database tasks
-

Projects

Banking & Financial Systems:

- Agrani Agent Banking System
- Agrani Internet Banking System
- Agrani SMS Alert System
- Bank Payment Gateway System
- Unified Messaging Platform System
- DOER Pay Point System
- NRBCB Agent Banking System

Government & Enterprise Systems:

- MRA Office Management System
- MRA NID Verification System
- MRA Staff Information Bureau
- NBR SMS Alert System
- Agent Licensing Online Module
- Agriculture Cluster Admission System

Role: Full-Stack Engineering including Requirement Gathering & Analysis, System Design & Software Architecture, Backend Development, Database Administration, Deployment, Production Support, and Client Interaction

Education

BSc in Computer Science & Engineering

American International University-Bangladesh (AIUB)

CGPA: 3.31 / 4.00 | 2018

Higher Secondary Certificate (HSC)

Cantonment Public School & College, Saidpur

CGPA: 4.50 / 5.00 | 2014

Secondary School Certificate (SSC)

Cantonment Public School & College, Saidpur

CGPA: 4.81 / 5.00 | 2012

Key Strengths

- End-to-end system ownership (Requirement → Design → Development → Deployment → Support)
- Banking & fintech domain expertise (Agent Banking, Payment Systems)
- Backend API development (Node.js, Java, Python)
- Docker-based deployment and GitLab CI/CD pipeline configuration
- Database performance optimization & large-scale data handling
- System design & software architecture understanding
- Automation & reconciliation systems (process optimization)
- Production support & client-facing problem solving
- Experience working across 12+ enterprise-grade systems
- AI engineering and prompt engineering skills
- Effective use of AI tools and agent-based workflows for productivity and automation
